CHASSIS DESCRIPTION:

The ESCAPE-17 chassis is designed to achieve great performance with medium-hard compound tyres. Its frame is composed of Ø30 tubes for the nose and cross-members, and Ø32 tubes for the side members. This gives flexibility and stability to the frame, allowing excellent grip without compromising smoothness. The frame structure was designed to specifications to accommodate the Rotax DD2 engine and features a single bearing support on the left side.

Suitable for the categories ROTAX DD2.
