#### CHASSIS DESCRIPTION

The ESCAPE-17 chassis is designed to achieve great performance with medium-hard compound tyres. Its frame is composed of Ø32 tubes for the nose and cross-pieces, and Ø30 tubes for the side. This gives flexibility and stability to the frame, allowing excellent grip without compromising smoothness. The magnesium version makes the chassis lighter and guarantees more consistent performance, especially in seasons with high temperatures. In addition, the magnesium bearing support favour load transfer in bends.
